

Exp No 3 Survey report on Emerging Trends in low code application development.

AIM::

To study the emerging trends in low code application development and understand how low code platforms are changing the software development process

Emerging tools.

1. AI assisted development
2. Mobile application development
3. Cloud Based Development.
4. Workflow automation.
5. Integration with API
6. Citizen development

Advantages:

- * Fast development
- * Easier Maintenance.

Result::

The emerging tools in low code app development were survived and understood.
